WE believe no city on the continent can, pro rata, show as rapid a growth. Come to us and share in this great development. Calgary has cheap Electric Power, Natural Gas, and is only 60 to 100 miles from Canada's largest coal mines. It is the metropolis of all that great territory lying between Winnipeg and Vancouver.

Calgary has wholesale houses, over 180 in number, and is headquarters for over 1000 commercial travelers; also has numerous large industries, including C. P. R. R. shops, employing 2500. Splendid opportunities for further wholesale houses and industries.

Calgary has a splendid climate, avoiding extremes of heat and cold, has fine schools, including colleges and a university—now under construction—churches, theatres, and is only 80 miles from Banff and the Canadian National Park, the most popular summer resort on the continent.

For further information address: Industrial Commissioner, Industrial and Development Bureau, Calgary, Canada.
